Presents in partnership with

An Agency of the Government of Ontario

Explore the Natural World of Planet Earth with Dr. Roberta Bondar

Academically one of the most distinguished astronauts to have flown in space, Dr. Bondar is also the only astronaut to use fine art photography to explore and reveal Earth's natural environment from the surface.

You are invited to attend Dr. Roberta Bondar's presentation entitled "Earth Matters" and to launch the **Ontario 150 Bondar Challenge** to encourage students of all ages to express what they admire and value in the natural world and in their community through a photography challenge. This tour celebrates the 25th anniversary of her historic spaceflight and Ontario's 150th anniversary.

Presentation to grade 6 to 12 students and general public (ticket required)

Date: Monday, September 18th

Time: 1:00 pm
